

Point-by-Point Response to Technical Check

Manuscript: mapgis2shp: an open-source Python reader for the MapGIS 6.x/67 binary vector formats, validated against the native export

Manuscript ID: de747810-0439-46b3-994e-f0fb419be525

Journal: Earth Science Informatics

We thank the editorial team for the technical check. We have addressed both points as requested. No other changes were made to the manuscript.

1. Figure citation positions (Fig 1 and Fig 2)

Editor's comment: The position of Figure Citation (Fig 1 and Fig 2) is not defined in the manuscript. Please make sure the figure is cited in the text and indicate where it should be placed.

Response: We have added in-text citations for both figures:

- Figure 1 is now cited at the end of Section 2 (Background): *"Figure 1 summarises this layout."*
- Figure 2 is now cited at the end of Section 3.1 (Architecture): *"Figure 2 illustrates this pipeline."*

Both figures are placed immediately after their respective citations in the text.

2. Table citation position (Table 2)

Editor's comment: The position of Table Citation (Table 2) is not defined in the manuscript. Please indicate where the table needs to be placed.

Response: We have added an in-text citation for Table 2 at the end of Section 4.3 (Results): *"Table 2 summarises these results."* The table is placed immediately after this citation.

All other figures and tables (Tables 1, 3, 4, and 5) were already cited in the text and required no changes.
