

a Common file header (shared by .wt / .wl / .wp)

b Type-specific record sections after the header

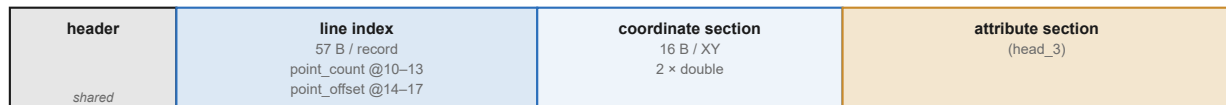

.wt point

magic D22

.wl line

magic D21

.wp polygon

magic D23

All integers little-endian; strings encoded GBK. Magic byte codes: D22 = point (.wt), D21 = line (.wl), D23 = polygon (.wp). Schematic; section widths not to scale.
